TECHNICAL NOTES	37

## Introduction

This publication presents statistical information on a quarterly basis on the post-assistance outcomes achieved by job seekers following a period of labour market assistance funded by the Department of Education, Employment and Workplace Relations (DEEWR). This publication was produced previously by the Department of Employment and Workplace Relations (DEWR).

The post-assistance outcomes are measured through the Department's Post-Program Monitoring (PPM) survey. The survey measures outcomes achieved by job seekers around three months after they exit labour market assistance.

This publication covers Job Network and most complementary services delivered by the Department to job seekers.

- Section 1 provides the post-assistance outcomes for the services followed up through the PPM survey. For the larger programs the outcomes have been disaggregated by job seeker characteristics. The post-assistance outcomes are broken down into full-time and part-time as well as total employment, education and training outcomes and positive outcomes. Positive outcomes include employment and/or education and training outcomes. Positive outcomes are less than the sum of employment and education and training outcomes as a job seeker could achieve both outcomes.
- Section 2 provides a trend analysis of positive outcomes over the last seven years for broadly comparable services.
- Section 3 shows commencements in various forms of employment assistance. For a number of programs the commencements have been disaggregated by job seeker characteristics.
- Section 4 presents commencement and employment outcomes data at the DEEWR Labour Market Region level.
- Section 5 provides a trend of receipt of income support payments over time and the movement of job seekers off Newstart Allowance and Youth Allowance (other) after participation in employment assistance.

When using time series figures, it is important to note that changes have occurred over time to the operation of the PPM survey. Readers are advised to review the technical notes section of the report which will provide, among other things, advice on issues that need to be taken into account when interpreting the results in this report.

### Time periods and data used in this report

This report contains outcomes data for job seekers who exited assistance, or achieved a 13 week employment or education outcome, in the 12 months to 31 March 2008 and their post assistance outcomes around three months later.

Intensive Support post assistance outcomes should not be confused with *paid interim* or *paid final* outcomes. Post assistance outcomes are *all* employment and education outcomes while paid outcomes relate to a subset of employment and education outcomes where employment service providers receive payment for outcomes.

Commencement and placement data, derived from DEEWR and Centrelink administrative systems, relate to job seekers who were placed in a job or commenced labour market assistance between 1 July 2007 and 30 June 2008 and 1 July 2006 and 30 June 2007.

### For more information

For further information, please contact Michael Cameron (02) 6121 7240 or e-mail [surveys@deewr.gov.au](mailto:surveys@deewr.gov.au).

## Key Results

### Positive Outcomes

The positive outcomes (employment and/or education/training) rates achieved in the year ending June 2008 were:

*76% for Job Placement*

*63% for Intensive Support job search training*

*57% for Intensive Support customised assistance*

*60% for Intensive Support*

*90% for New Enterprise Incentive Scheme*

*43% for Work for the Dole*

*37% for Community Work Placements*

*25% for the Personal Support Programme*

*53% for Disability Employment Network*

*41% for Vocational Rehabilitation Services*

*72% for Indigenous Employment Program Structured Training and Employment Projects (STEP) and*

*71% for Indigenous Employment Program Wage Assistance.*

### Commencements

In the year to 30 June 2008, commencements in the various types of labour market assistance included:

*338,000 in Job Search Support*

*360,000 in Intensive Support*

*6,400 in New Enterprise Incentive Scheme*

*17,700 in the STEP and Wage Assistance elements of the Indigenous Employment Program*

*49,700 in the Personal Support Program*

*43,100 in Vocational Rehabilitation Services*

*32,900 in the Disability Employment Network*

*69,800 in Work for the Dole and*

*300 in Community Work Placement.*

### Job Vacancies and Placements

In the year to end June 2008, 2,522,700 vacancies were notified on the Australian Job Search database, of which around 1,012,300 were lodged by Job Network Members or Job Placement Organisations (including vacancies lodged through the Internet and Teleservicing). In the year to end June 2008, over 577,900 job placements were recorded by Job Network members and Job Placement Organisations.

## Background

### Changes to employment services

On 1 July 2003, significant changes were introduced to the employment services market. The *Active Participation Model* (announced in the 2002–03 Budget) provides ongoing customised service to job seekers including the Job Seeker Account to fund preparation of job seekers for work.

In the 2005–06 Budget further reforms were announced as part of the overarching *Welfare-to-Work* changes. These reforms were designed to increase participation and achieve long-term employment outcomes for key target groups including: mature age job seekers; parents; People with a Disability; and the very long-term unemployed.

### Access to income support

From 1 July 2006 changes in eligibility for income support were introduced for working age Australians. Eligibility for Parenting Payment Single (PPS) and Parenting Payment Partnered (PPP) for new claimants was altered with the threshold age for youngest child changing to 6 (if partnered) or 8 (if single). Similarly, eligibility for the Disability Support Pension (DSP) was varied. People with a disability seeking income support are referred to a Job Capacity Assessment (JCA) to determine their work capacity. Those unable to work for at least 15 hours per week will be eligible for DSP. If a new claimant does not meet the new eligibility criteria for PPP, PPS or DSP they are able to claim an alternative income support payment (typically Newstart Allowance).

### Participation in Job Network assistance

On registration with Centrelink, each eligible job seeker is referred to a single Job Network member who will provide services to them while they remain eligible for assistance or get a job. Two services are delivered by all Job Network members under the *Active Participation Model* – Job Search Support and Intensive Support.

**Job Search Support** services are available to all eligible job seekers immediately upon registration with Centrelink or a Job Network member and continue until the job seeker leaves employment services. On first contact with their Job Network member, job seekers have their vocational profile entered into the JobSearch database for daily matching against new job vacancies. Job seekers also have access to a range of other job search facilities such as touchscreens, computers and faxes as well as assistance in the preparation of job applications.

If an eligible job seeker has not found work within the first three months of Job Search Support, their Job Network member will arrange for them to participate in Intensive Support. **Job search training** is the first element of Intensive Support. It assists job seekers to obtain employment through individually tailored assistance that is designed to improve their job search skills, confidence and expand their job search networks. As of 1 July 2006, **Employment Preparation** assistance was introduced into Job Network. Superseding the Transition to Work program, it provides assistance to parents, mature age job seekers and those on Carers Allowance. Eligible job seekers can access Employment Preparation either while they are in Job Search Support or at the start of their assistance in the Intensive Support Stream depending on their Job Network eligibility.

After six months of unemployment (and periodically thereafter), most activity-tested job seekers will be required to fulfill a **Mutual Obligation requirement** (usually Work for the Dole). During these periods job seekers remain in Intensive Support and it is the responsibility of their Job Network member to ensure that they continue to be actively engaged in job search activities and improving their job prospects.

Job seekers who have been unemployed for at least 12 months or are identified by Centrelink as being highly disadvantaged at registration receive **Intensive Support customised assistance**. Over a six month period this service provides tailored assistance to address individual barriers to employment and their efforts in looking for work. Job seekers who are still unemployed after 24 months (or 12 months for the highly disadvantaged) have access to a second six month period of customised assistance.

From July 2006 job seekers approaching the end of their second period of customised assistance will undergo an assessment. Job seekers with a demonstrated history of job search avoidance can be referred to **Full-Time Work for the Dole** comprising of 1100 hours over around 10 months. In June 2007 this was changed and Job Network members could refer job seekers to full-time Work for the Dole if they believed that the job seeker would benefit from participation in the program. Alternatively, job seekers may have access to

**Wage Assist** support which provides a wage subsidy payment of \$350 per fortnight to facilitate placement into a full-time ongoing job. The assessment may also indicate that the job seeker might benefit from assistance from a complementary program.

### **Complementary programs**

The **New Enterprise Incentive Scheme (NEIS)** helps eligible unemployed people to start up and run a new, viable small business. NEIS assistance includes three months of accredited training and business advice and mentoring, at the end of which participants submit a business plan. These business plans are then scrutinised closely to ensure that only those of the highest quality are accepted as eligible for NEIS assistance. NEIS assistance then takes the form of ongoing mentoring and a NEIS wage payable for the 12 months following commencement.

The **Work for the Dole (WfD)** Program aims to develop the work habits of participants through involving them in quality projects that are of value to the community. Job seekers are required to participate in WfD for up to six months over a twelve month period. This means that job seekers can participate in a number of projects with different CWC's before completing their placement.

The **Indigenous Employment Program (IEP)** comprises six key elements, being: **Wage Assistance**; **Structured Training and Employment Projects (STEP)**; the Community Development Employment Projects Placement Incentive; the Corporate Leaders for Indigenous Employment Project; the National Indigenous Cadetship Program; and the Voluntary Service to Indigenous Communities Foundation. The results for both Wage Assistance and STEP are published in this report. **Wage Assistance** is a wage subsidy paid to employers over 26 weeks providing ongoing employment. In **STEP**, employers in the private sector, and regional and community based employment sponsor organisations providing jobs, generally involving accredited training or a traineeship.

The **Disability Employment Network (DEN)** was introduced in July 2006. DEN members provide specialised assistance to job seekers with disability who require ongoing support to find and maintain employment. Some DEN members specialise in services for a particular disability type, for example job seekers with psychiatric or intellectual disabilities. Services provided by DEN members include the provision of training, canvassing and approaching employers to source employment opportunities and assistance for the job seeker to remain in sustainable employment. The DEN includes both a capped and uncapped stream of assistance, with eligibility for each stream dependent on the length of time that support is likely needed to be provided and the job seekers' future work capacity. Job seekers with greater needs for assistance are eligible for the capped stream of assistance, while the uncapped stream is designed to provide jobseekers with assistance for a maximum period of two years.

The **Vocational Rehabilitation Services (VRS)** offers job seekers help to understand, compensate for or manage injury or disability, or the limitations or restrictions imposed by injury or disability. The service also helps job seekers build work capacity and/or develop new work strategies to avoid re-injury. As is the case with the Disability Employment Network there are two streams of assistance available – Fixed and Demand. The Demand Stream is available for all job seekers assessed as having a work capacity of 15 to 29 hours per week, while access to the Fixed Stream is more limited.

**Job Placement, Employment and Training (JPET)** is a pre-employment program which provides young people with transitional assistance to help them overcome barriers in their lives and re-engage them with: education, training or further study; employment or employment assistance; programs with a workforce participation focus; specialist assistance relevant to their needs and barriers; or the social life of the community.

The **Personal Support Program (PSP)** is a pre-employment program that provides individual support to participants who, because of multiple non-vocational barriers, are unable to get a job or benefit from employment programs such as Job Network.

## Section 1: Summary of Labour Market Assistance Outcomes

Section 1 of this Labour Market Assistance Outcomes report presents the three month post assistance outcomes derived from the department's Post-Program Monitoring (PPM) survey. Results reported relate to job seekers who were in-scope for inclusion in the Intensive Support or Disability Employment Network (DEN) samples or ceased Intensive Support customised assistance, Intensive Support job search training, New Enterprise Incentive Scheme (NEIS), Work for the Dole, Community Work, Indigenous Employment Program (IEP) Structured Training and Employment Projects (STEP), IEP Wage Assistance, Personal Support Programme (PSP) or Vocational Rehabilitation Services (VRS) or achieved an eligible Job Network placement between 1 April 2007 and 31 March 2008 and outcomes achieved by 30 June 2008.

The in-scope Intensive Support population comprises those job seekers who commenced in Intensive Support between 1 April 2004 and 31 March 2007 and left Intensive Support or were receiving Intensive Support assistance for 12, 24 or 36 months between 1 April 2007 and 31 March 2008. The in-scope population for DEN includes participants who left DEN or achieved a 13 week payable employment outcome between 1 April 2007 and 31 March 2008.

In editions of Labour Market Assistance Outcomes pre-June 2004, employment, unemployment, not in the labour force and further assistance outcomes were recorded as being mutually exclusive (i.e. they added up to 100%). As jobseekers are continuously in assistance under the *Active Participation Model* (APM), clients in further assistance are surveyed and their responses are used to determine their labour market status. As a result, care should be taken when comparing outcomes for current services with labour market programs operating prior to the introduction of the APM. The Technical Notes at the end of this report discuss these issues further.

Table 1.1 shows labour market outcomes and further assistance levels of all job seekers three months after leaving the various types of employment assistance. Job seekers are categorised as employed, unemployed, or not in the labour force. For most programs outcomes levels are similar to that reported in the March quarter with encouraging increases in both the IEP – STEP and IEP – Wage Assistance post-assistance employment level.

Table 1.2 shows job seekers' shares of full-time and part-time employment, education/training and positive outcomes three months after leaving

different types of labour market assistance. Positive outcomes include employment and education/training outcomes. Positive outcomes are less than the sum of employment and education/training outcomes because some job seekers achieve both an employment and an education outcome. Positive and employment outcomes exclude Indigenous job seekers who return to Community Development Employment Projects (CDEP) after leaving labour market assistance. Education and training outcomes include job seekers who are studying at a secondary school or college, TAFE, business college or university. Employment and positive outcome rates for most services are comparable to those achieved in the March quarter 2008.

The results for Intensive Support are presented in Table 1.3. It reports the post assistance outcomes achieved for the 12, 24 and 36 month in-scope populations for Intensive Support. The 12 month Intensive Support population relates to job seekers who commenced in Intensive Support between 1 April 2006 and 31 March 2007 and became in-scope for survey between 1 April 2007 and 31 March 2008 and outcomes achieved three months later. The 24 and 36 month populations have in-scope commencement periods one and two years earlier (respectively) than for the 12 month cohort but the same in-scope period for survey.

Outcomes achieved in the June quarter are similar to those achieved in the March quarter, with just over to 60 per cent in employment and/or education/training. Outcomes for the Department's equity groups are similar or higher than reported in the March quarter. Almost half (49.7 per cent) of participants with a disability were successful in achieving a positive outcome following Intensive Support assistance.

Table 1.4 shows the post assistance outcomes for job seekers from their first phase of Intensive Support customised assistance (ISca1). Overall, 58.3 per cent of ISca1 participants were employed and/or in education/training three months following assistance. For Sole Parents and job seekers from a Culturally and Linguistically Diverse (CALD) background it is over 60 per cent.

Outcomes for a job seeker's second period of Intensive Support customised assistance (ISca2) are presented in Table 1.5. Outcomes, as expected, are lower for those completing their second phase of ISca with a positive outcomes rate of 52.7 per cent. This reflects their relative disadvantage compared to ISca1 participants.

Aggregate results for Intensive Support customised assistance are presented in Table 1.6. The positive outcome rate is similar to that achieved in the March quarter at just over 56 per cent. For each age group, except those aged 50 and over, the positive outcome rate achieved was strong (in the range of 58 – 60 per cent).

Results for Intensive Support job search training are presented in Tables 1.7 – 1.9. Post assistance outcomes by duration on allowance are not provided because almost all job seekers will access job search training immediately on their entry to the Intensive Support stream of assistance – which usually occurs at the three month mark of unemployment. Results for the full 100 hour Intensive Support job search training (ISjst) are presented in Table 1.7. Results for the 30 hour abridged Intensive Support job search training refresher (ISjstr) versions of ISjst is reported in Table 1.8. Unlike the two phases of ISca, there is relatively little difference in the outcomes achieved by either phase of Intensive Support job search training assistance, both achieving positive outcome rates around 63 per cent. The aggregate results for the two phases are reported in Table 1.9.

Post-assistance outcomes for Job Placements are presented in Table 1.10. For job seekers who achieved a Job Placement within three months of leaving labour market assistance such as Intensive Support job search training, Intensive Support customised assistance and Work for the Dole, the outcome is excluded from Job Placement but included under the program or service they participated in. Post-assistance outcomes for Job Placement have sustained their high levels, with over three-quarters of participants in employment and/or education three months after their original job placement. Encouragingly, mature age job seekers (i.e. those aged 50 and over) who do achieve a Job Placement are as likely as other job seekers to be employed three months after being placed in that job.

The New Enterprise Incentive Scheme (NEIS) has traditionally experienced higher outcomes compared to other types of labour market assistance. This is due in part to the careful selection of viable businesses by NEIS providers prior to the commencement in assistance, as well as the characteristics of job seekers involved. Post-assistance outcomes for NEIS continue to remain strong having increased from the March quarter and are well above stated targets (see Table 1.11). Unlike some of the other programs

there is only limited divergence in outcomes by gender.

Post-assistance outcomes for Work for the Dole (WfD) relate to WfD participants referred to Community Work Coordinators (CWC). Employment outcomes are not part of the program's immediate objectives but are included here to provide a comprehensive presentation of the performance of DEEWR funded assistance. For the purposes of PPM, job seekers are surveyed whenever they have a break between CWC placements of more than 3 months since their last CWC placement in a 12 month period. It should be noted that outcomes levels may change under the APM from pre-APM levels due to changes in the PPM survey methodology. See the technical notes for more information. Table 1.12 shows that outcomes are comparable to those reported for the March quarter 2008, exits have dropped by about 18% from the March quarter.

Employment and positive outcome rates for the Vocational Rehabilitation Services (VRS) program (as reported in Table 1.13) are comparable to those achieved in the March quarter. With the exception of mature age participants well over 35 per cent were in some form of employment after leaving VRS.

Post-assistance outcome rates for the Disability Employment Network (DEN) are reported in Table 1.14. Around 53 per cent of participants had achieved a positive outcome. Particularly encouraging is that close to half of the participants in DEN who had been on income support for more than three years when they commenced their assistance had achieved a positive outcome. It should be noted, however, that the outcomes reported for DEN include some job seekers who had achieved a 13 week employment milestone but are still in DEN. The inclusion of these job seekers in the in-scope population results in a higher outcome rate than if only exits from DEN were assessed.

Post-assistance outcomes for the Personal Support Programme (PSP) are comparable to that achieved in previous quarters. Table 1.15 shows that despite catering to participants facing significant barriers, outcomes remain relatively high in relation to comparable programs with around 25 per cent of participants in employment and/or education/training three months following assistance. For Sole Parents, positive outcomes are above 34 percent.

**Table 1.1: Post-assistance<sup>1</sup> labour market outcomes year to end June 2008**

Labour market assistance	Employed (%)	Unemployed (%)	Not in the Labour Force (%)	Further Assistance <sup>2</sup> (%)	Exits (number)
Job Placement	72.6	22.8	4.6	0.8	85,014
<i>Fully Job Network Eligible</i>	68.6	26.3	5.1	0.8	51,999
<i>Job Search Support Only</i>	79.1	17.0	4.0	0.7	33,015

Intensive Support job search training	53.3	38.9	7.8	3.7	131,845
<i>Intensive Support job search training (100 hours)</i>	53.1	39.1	7.8	3.3	113,735
<i>Intensive Support job search training (30 hours)</i>	54.3	37.8	8.0	6.5	18,110
Intensive Support customised assistance	46.6	37.0	16.3	13.4	240,443
<i>Intensive Support customised assistance 1</i>	47.6	35.5	16.9	12.3	180,472
<i>Intensive Support customised assistance 2</i>	43.7	41.7	14.6	16.7	59,969
NEIS	88.1	6.8	5.1	2.2	6,174
Work for the Dole	35.9	51.9	12.1	27.7	70,074
Community Work	28.7	58.9	12.4	36.2	622
IEP - STEP	67.8	25.6	6.6	18.3	5,212
IEP - Wage Assistance	67.3	22.0	10.7	23.8	2,746
Disability Employment Network <sup>4</sup>	45.7	24.7	29.5	na	25,159
Personal Support Programme	19.5	33.1	47.4	na	32,144
Vocational Rehabilitation Services	35.8	20.6	43.6	na	27,136

1. Post assistance outcomes are measured three months after job seekers cease assistance and relate to job seekers who were in-scope for inclusion in the Intensive Support or Disability Employment Network (DEN) samples or job seekers who ceased Intensive Support customised assistance, Intensive Support job search training, New Enterprise Incentive Scheme (NEIS), Work for the Dole, Community Work, Indigenous Employment Program (IEP) Structured Training and Employment Projects (STEP), IEP Wage Assistance, Personal Support Programme (PSP) or Vocational Rehabilitation Services (VRS) or achieved an eligible Job Network placement between 1 April 2007 and 31 March 2008. Employment outcomes exclude Indigenous job seekers who return to Community Development Employment Projects (CDEP) after leaving labour market assistance.
2. Further assistance includes commencements in DEEWR funded labour market assistance. Job seekers who do not achieve an employment outcome are treated as either unemployed or not in the labour force. Further assistance figures are not available for the Personal Support Programme, Disability Employment Network or Vocational Rehabilitation Services.
3. Job seekers who commenced Intensive Support between 1 April 2004 and 31 March 2007 and left Intensive Support or were receiving Intensive Support assistance for 12, 24 or 36 months between 1 April 2007 and 31 March 2008 and outcomes achieved around three months later. The commencement period is limited to ensure that only those participants that could have reached 12, 24 or 36 months participation in Intensive Support are included in the in-scope sample.
4. Job seekers who left Disability Employment Network without achieving a 13 week employment milestone or achieved a 13 week payable employment outcome between 1 April 2007 and 31 March 2008 and outcomes achieved around three months later

CALD <sup>5</sup>	21.9	24.4	46.2	17.9	60.2	51,283
Sole Parents	22.6	34.6	57.2	15.1	67.7	46,100
<b>Total</b>	<b>23.0</b>	<b>28.6</b>	<b>51.6</b>	<b>12.3</b>	<b>60.1</b>	<b>310,183</b>

1. Job seekers who commenced Intensive Support between 1 April 2004 and 31 March 2007 and left Intensive Support or were receiving Intensive Support assistance for 12, 24 or 36 months between 1 April 2007 and 31 March 2008 and outcomes achieved around three months later. The commencement period is limited to ensure that only those participants that could have reached 12, 24 or 36 months participation in Intensive Support are included in the in-scope sample.
2. Positive outcomes include employment and education/training outcomes. Positive outcomes are less than the sum of employment and education/training outcomes because some job seekers achieve both an employment and an education/training outcome. Positive and employment outcomes exclude Indigenous job seekers who return to Community Development Employment Projects (CDEP) after leaving labour market assistance.
3. See the technical notes at the end of the report for a definition of the in-scope population.
4. Equity groups are not mutually exclusive.
5. People from Culturally and Linguistically Diverse backgrounds from other than main English Speaking countries.

1. Job seekers who were placed in a Job Network eligible job between 1 April 2007 and 31 March 2008 and outcomes achieved around three months later. For job seekers who achieved a Job Placement within three months of leaving labour market assistance such as Intensive Support job search training, Intensive Support customised assistance and Work for the Dole, the outcome is excluded from Job Placement but included under the program or service they participated in.
2. Positive outcomes include employment and education/training outcomes. Positive outcomes are less than the sum of employment and education/training outcomes because some job seekers achieve both an employment and an education/training outcome. Positive and employment outcomes exclude Indigenous job seekers who return to Community Development Employment Projects (CDEP) after leaving labour market assistance.
3. Outcomes refer to Fully Job Network Eligible (FJNE) job seekers only as educational attainment and equity group details are not recorded for Job Search Support Only (JSSO) and JSSO job seekers are not on income support. Equity groups are not mutually exclusive.
4. People from Culturally and Linguistically Diverse backgrounds from other than main English Speaking countries.
5. Includes Fully Job Network Eligible (FJNE) job seekers who may be eligible for other Job Network services.
6. Includes Job Search Support Only (JSSO) job seekers who are only eligible for Job Search Support services.

## Section 2: Trends in outcomes for Labour Market Assistance

An important measure of the effectiveness of employment assistance includes the longer-term trends in outcomes. It provides an assessment of whether over the period of operation of an intervention the service providers have developed effective servicing strategies.

These outcomes can be influenced by a range of exogenous factors such as the strength of the labour market, the distribution of available jobs and the position of the economy within the economic cycle.

Similarly it would be expected that in the period following the introduction of a new intervention, outcomes will increase at a faster rate than interventions that have been in place for a longer period of time as effective servicing strategies are developed.

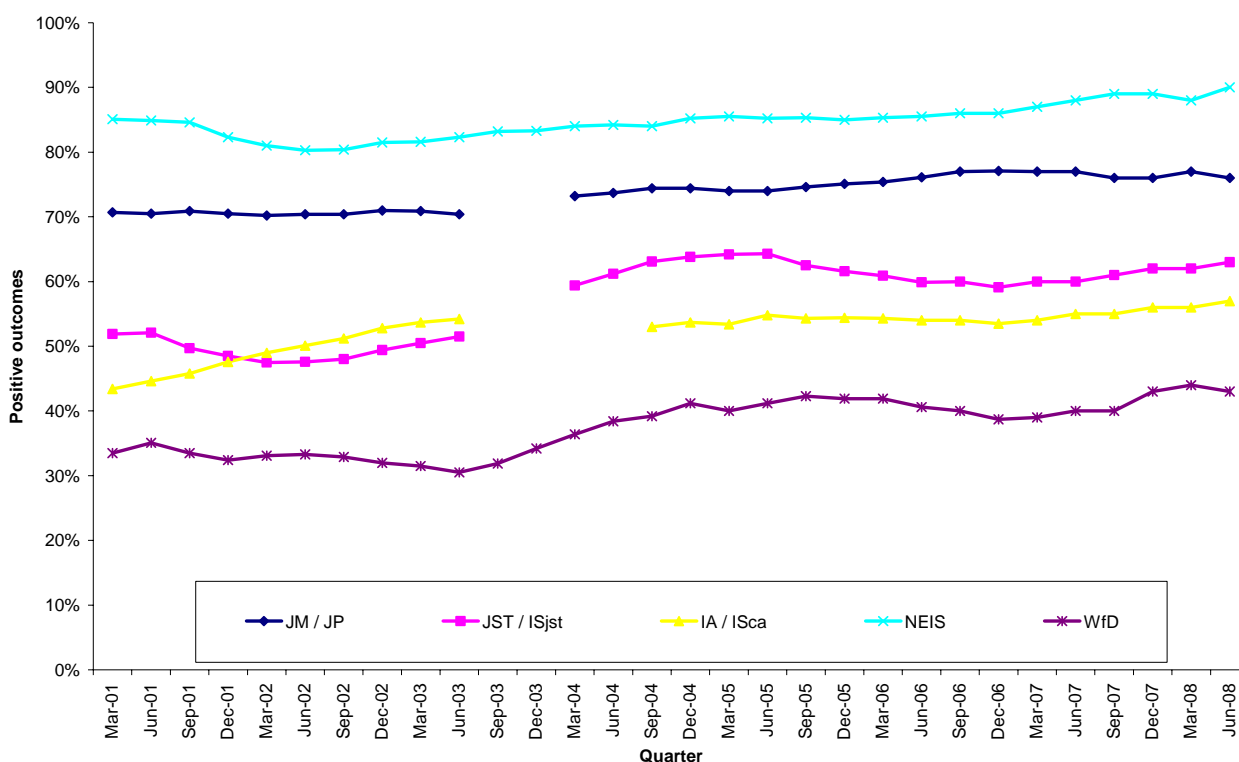

Figure 2.1, provides positive outcome results for the main employment services provided over the

last seven years (from March 2001). For those interventions superseded by *Active Participation Model* assistance, the services they superseded are also included. There is a break in the series of between three and five quarters during the transition from ESC2 to ESC3 for these interventions. This was due to the fact that there were insufficient PPM survey responses to provide for robust outcome estimates.

Outcomes for the suite of Job Network and Work for the Dole services have generally continued to trend up from the outcomes achieved under ESC2. All the components have higher outcomes currently than in March 2001.

Some of the growth can be attributed to changes to the methodology used for the PPM survey. See the Technical Notes at the end of this report for further information.

**Figure 2.1: Positive outcome trends for Job Network and Work for the Dole services**

1. Positive outcomes for: Job Matching/Job Placement (JM/JP); Job Search Training/Intensive Support job search training (JST/ISjst); Intensive Assistance/Intensive Support customised assistance (IA/ISca); New Enterprise Incentive Scheme (NEIS); and Work for the Dole (WfD) for Post-Program Monitoring outcomes from March 2001 to June 2008. Positive outcomes include employment and education/training outcomes. Positive outcomes exclude Indigenous job seekers who return to Community Development Employment Projects (CDEP) after leaving labour market assistance.

## Section 3: ACCESS TO AND PARTICIPATION IN LABOUR MARKET ASSISTANCE

Section 3 of this Labour Market Assistance Outcomes report presents data on commencements in assistance. Commencement numbers are sourced from the Department's administrative data records and relate to job seekers who commenced in assistance between 1 July 2007 and 30 June 2008.

Commencements are recorded for the two streams of assistance available under Job Network – Job Search Support and Intensive Support – as well as for the phases within the Intensive Support stream. Commencements are also recorded for a range of complementary programs, as well as the number of Job Placements achieved. A commencement in the Job Search Support Stream is determined through the completion of a job seeker's Vocational Profile.

Commencement levels for the years ending June 2007 and June 2008 are reported in Table 3.1. It is evident that commencements in Job Network (Job Search Support, Intensive Support, job search training and customised assistance) have fallen from the levels achieved in the year ending June 2007. This reflects the general strength of the labour market as evidenced by the fall of Newstart Allowance and Youth Allowance (other) job seekers outlined on page 35. Work for the Dole commencements have also fallen from the previous year. This fall can be attributed to the continual strength of the economy as well as the impact of the transition to the ESC3 extension period and changes to Welfare-to-Work in July 2006. The start of these changes would have seen a larger number of job seekers eligible for Work for the Dole.

On the other hand, commencements in the Structured Training and Employment Projects (STEP) component of the Indigenous Employment Program almost tripled compared to the previous year. This reflects the impact of the changes introduced to the Community Development Employment Projects in 2006.

Access to services and programs by job seekers with different characteristics will depend on their eligibility and on their assessed capacity to benefit from the assistance provided. Job seekers with particular characteristics may be under-represented in some types of assistance but over-represented in others. Hence, it is important to look at all types of assistance in assessing equity of assistance.

Table 3.2 shows the range of Job Network services and the job seeker characteristics of those who received assistance in the year up to

30 June 2008. Also provided is the demographic distribution of the Newstart and Youth Allowance (other) population at 30 June 2008.

Older job seekers' participation in employment assistance remains lower than their proportion of the Newstart Allowance/Youth Allowance (other) population. This is generally indicative of the alternatives available to these job seekers to meet their participation requirements as well as the higher level of exemptions.

The proportion of short-term unemployed job seekers (i.e. on income support for less than six months) in Job Search Support is influenced by the proportion of Job Search Support Only job seekers who have had a Vocational Profile completed, but may not be on income support.

Table 3.3 shows, for a range of job seeker characteristics, the proportion in the eligible population and commencements in the New Enterprise Incentive Scheme (NEIS). This is shown only for those on Newstart and Youth Allowance (other) and who are 18 years of age or older. Given the nature of the program some types of job seekers are less likely to participate in NEIS than others. This is particularly the case for groups such as youth (those aged 15 – 20) and the equity groups. On the other hand, persons with a post secondary education participate in NEIS at a higher rate than their proportion of the eligible population.

Table 3.4 shows, for a range of job seeker characteristics, the proportion in the eligible population and commencements in Work for the Dole (WfD). This is shown only for those on Newstart and Youth Allowance (other) and who are 18 years of age or older. Job seekers are required to participate in WfD for up to six months over a twelve month period. This means that job seekers can participate in a number of different WfD projects and with different CWCs before completing their placement. Each time a job seeker starts with a CWC, a new commencement is recorded.

WfD tends to exhibit different patterns in participation from NEIS with younger job seekers proportionally over-represented in the participating population in relation to their eligibility, while job seekers unemployed for less than six months were under-represented. Again this reflects the unique eligibility requirements of the program.

**Table 3.1: Participation by type of labour market assistance in each of the past two years<sup>1</sup>**

Labour market assistance	Year to end June 2007	Year to end June 2008
	Commencements	Commencements (Numbers)
Job Search Support <sup>2</sup>	420,794	337,622
Intensive Support <sup>3</sup>	372,190	360,130
job search training	114,913	105,667
first customised assistance (ISca1)	171,737	152,223
second customised assistance (ISca2)	67,806	57,880
Job Placement	645,569	577,868
New Enterprise Incentive Scheme	6,332	6,429
Work for the Dole	92,712	69,769
Community Work Placements	1,045	342

## Section 4: Participation and Outcomes by Region

Section 4 of this Labour Market Assistance Outcomes Report presents data on commencements in assistance, and employment outcomes, by the Department of Education, Employment and Workplace Relations (DEEWR) Labour Market Regions (LMR). A map of DEEWR regions is included in the Technical Notes of this report. The reporting at a regional level is restricted to the main types of Job Network assistance and Work for the Dole.

Commencement numbers are sourced from the Department's administrative data records and relate to job seekers who commenced in assistance between 1 July 2007 and 30 June 2008, while the post-assistance employment outcomes data relates to job seekers who ceased assistance or achieved an eligible Job Network placement between 1 April 2007 and 31 March 2008 and achieved outcomes around three months later. The employment services reported are Job Placement, Intensive Support job search training, Intensive Support customised assistance and Work for the Dole.

Commencements are recorded for the two streams of assistance available under Job Network – Job Search Support and Intensive Support – as well as the number of Job Placements achieved. A commencement in the Job Search Support Stream of assistance is determined through the completion of a job seeker's Vocational Profile.

Table 4.1 provides details of placements in Job Placement jobs and commencements in Job Search Support, Intensive Support and Work for the Dole by LMR. The number of placements and commencements in the various types of labour market assistance will depend on the size of the region, labour market conditions and the relative disadvantage of job seekers in the region.

This is demonstrated when comparing the number of commencements in the different forms of labour market assistance between the Greater Western Australia and South Western Australia LMR's. The Greater Western Australia LMR had larger numbers of commencements in Intensive Support in the year to end June 2008 yet achieved a comparable level of Job Placements and Job Search Support as the South Western Australia LMR.

Differences can also emerge in the relative participation levels by LMR. Table 4.2 shows the proportion of Newstart and Youth Allowance (Other) recipients as at 30 June 2008 compared to the proportion of Job Network eligible Job Placements and commencements in Job Search Support, Intensive Support and Work for the Dole. It is evident, for example, that a greater proportion of commencements in Work for the Dole occurred in New South Wales than would be expected based on its proportion of the Newstart Allowance and Youth Allowance (other) population. On the other hand, the participation in Work for the Dole in Western Australia is well below the Newstart Allowance and Youth Allowance (other) population.

Post-assistance outcomes at the LMR level, as reported in Table 4.3, also show some of the variability as seen in relation to commencements in assistance. Post-assistance outcomes in the Sydney LMR across the suite of employment services followed up are lower than that achieved for each program as a whole. Employment outcomes for the South Western Australia LMR on the other hand were higher than that achieved in Australia for each employment service reported. It is important to recognise that the labour markets within each LMR are not homogenous. There will be pockets of very strong and some weaker labour market conditions within each LMR. As a result the performance reported for each LMR should not be considered as the absolute performance of that LMRs providers.

**Table 4.1: Commencements in labour market assistance by region: June 2008<sup>1</sup>**

1. Employment outcomes exclude Indigenous job seekers who return to a Community Development Employment Projects (CDEP) after leaving labour market assistance.
2. Job Placement outcomes are for job seekers placed in an eligible Job Placement job between 1 April 2007 and 31 March 2008 and outcomes achieved around three months later. For job seekers who achieved a Job Placement within three months of leaving labour market assistance such as Intensive Support job search training, Intensive Support customised assistance and Work for the Dole the outcome is excluded from Job Placement but included under the program or service they participated in.
3. Post assistance employment outcomes relate to job seekers who ceased Intensive Support customised assistance, Intensive Support job search training or Work for the Dole between 1 April 2007 and 31 March 2008 and outcomes achieved around three months later.
4. Job seekers who commenced Intensive Support between 1 April 2004 and 31 March 2007 and left Intensive Support or were receiving Intensive Support assistance for 12, 24 or 36 months between 1 April 2007 and 31 March 2008 and outcomes achieved around three months later.

Source: The Post-Program Monitoring survey conducted three months after job seekers cease assistance.

## Section 5: Impact on Income Support Recipients

An important goal of employment assistance is to reduce or remove employment barriers experienced by job seekers so they can compete effectively for jobs. Higher levels of employment assistance are provided to the most disadvantaged job seekers.

While this report focuses mainly on the outcomes achieved by individual forms of assistance it is also important to note that other factors such as administrative/policy changes and economic conditions also have a significant impact on the number of income support recipients.

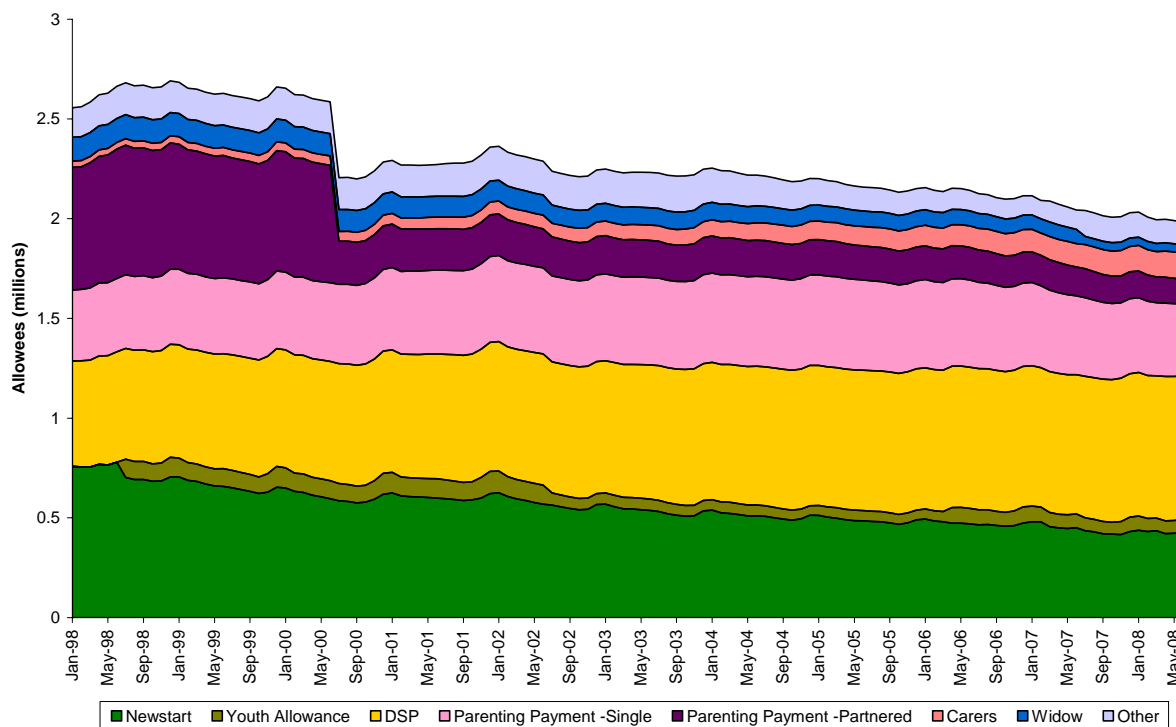

Figure 5.1 shows the changes over time in the number of working age allowance recipients. There has been a fall in the number of allowee recipients over time driven largely by a fall in the number of Newstart recipients. Data on income support recipients show that in the 12 months to the end of June 2008 the number of people in

receipt of Newstart or Youth Allowance (Other) decreased by over 27 700 to around 492 900 job seekers. The number of job seekers who were long-term recipients decreased by 18 800 recipients while the number of short-term recipients decreased by around 8 900.

On the other hand the number of Carer Pension and Disability Support Pension (DSP) recipients has risen over the period January 1998 to March 2008.

The number of Parenting Payment Partnered clients fell by around 65 per cent from July 2000 to June 2001. This drop was largely due to the basic component of Parenting Payment Partnered being incorporated into Family Tax Benefit Part B. Since July 2000 the number of Parenting Payment Partnered recipients has continued to fall.

Figure 5.1: Number of Income Support Recipients<sup>1</sup>

1. Figures quoted in the text are from the Department of Education, Employment and Workplace Relations: "Labour Market and Related Payments a monthly profile, June 2008".

Source: Trend series based on data from DEEWR administrative system

The impact of assistance can also be assessed by examining the income support status of participants after they leave assistance. Figure 5.2 shows the off-benefit status of job seekers three and six months after they had exited employment assistance.

Off-benefit outcomes are only measured for clients who were in receipt of Newstart and Youth Allowance (other) (i.e. activity tested beneficiaries) when they commenced their employment assistance placement. Other clients on non-activity tested benefits have different allowable earnings thresholds and their inclusion has the potential to distort the results.

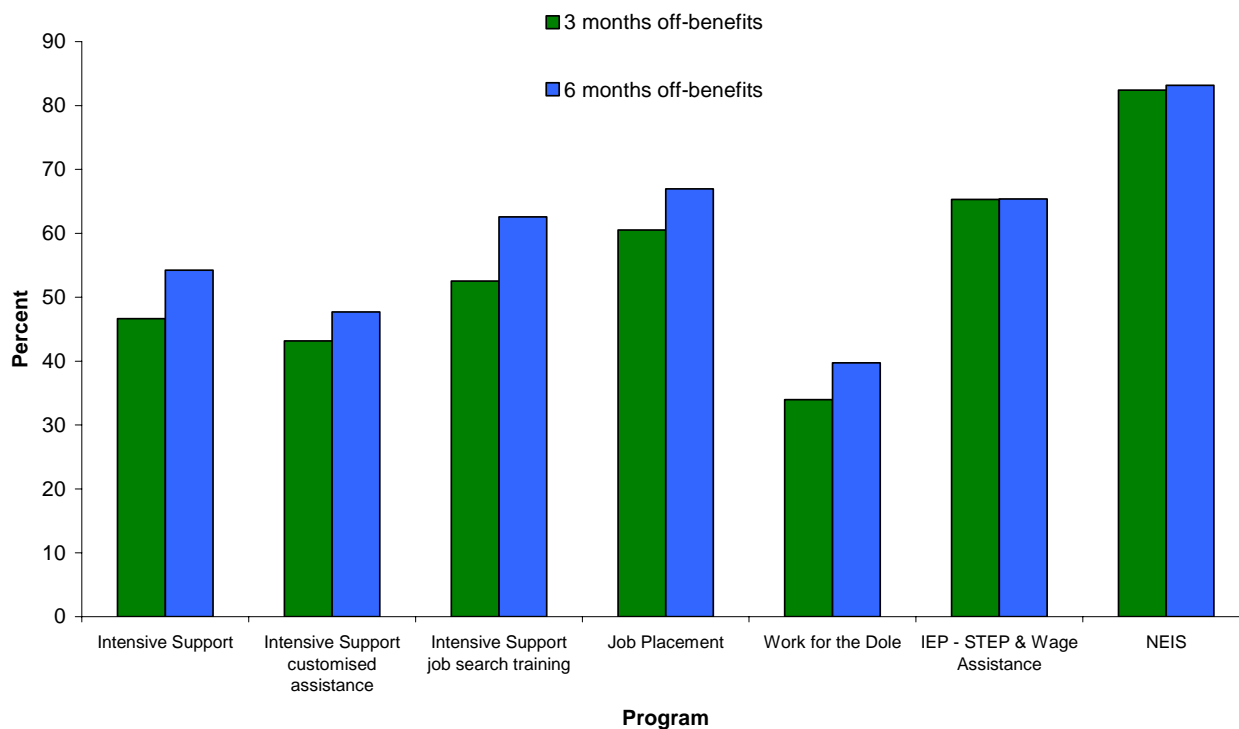

The majority of job seekers who move off income support do so for employment particularly full-time employment. For most programs, however, off-benefit outcomes levels are generally slightly lower than employment outcomes levels. This reflects the fact that three months after exiting an employment assistance placement the proportion of people in part-time work who remain on benefits is somewhat larger than the proportion that have moved off income support for reasons other than employment (e.g. leaving the labour market).

Three month off-benefit outcomes tend to mirror what is found in relation to employment outcomes with those programs that achieve high employment outcomes achieving high three month off-benefit outcomes. Those that achieve high off-benefit outcomes at three months experience little change at the six month mark. This indicates that for these programs the benefits happen relatively shortly after completing the program.

For other programs particularly those targeted at the more disadvantaged it is evident that there is a substantial rise in off-benefit levels between three and six months after leaving assistance. This indicates that the benefits of program participation tend to take longer to materialise for the job seeker. Notwithstanding this longer lead time strong off-benefit outcomes are achieved for most programs.

Off-benefit outcomes for Intensive Support are particularly strong. Over half of the in-scope Intensive Support population were off Newstart Allowance/Youth Allowance (other) six months after they became in-scope.

**Figure 5.2: Three<sup>1</sup> and six<sup>2</sup> month off-benefit status of job seekers following assistances**

1. Job seekers who left assistance between 1 April 2007 and 31 March 2008 and were not on income support three months later.

2. Job seekers who left assistance between 1 January 2007 and 31 December 2007 and were not on income support six months later.

# Technical Notes

## Data sources sampling further assistance and survey results

### *Data Sources*

The Department uses a number of data sources to determine the outcomes achieved by job seekers during and after they have ceased labour market assistance. The two main data sources are the Post-Program Monitoring (PPM) survey and the Department's administrative database held within the Integrated Employment System (IES).

The PPM survey has been undertaken since 1987 and is used to assess the labour force and education status of former program participants three months after they exit assistance. The IES records details of placements commencements and paid outcomes for labour market assistance.

### *Survey Sampling*

#### *Job Network and complementary programs*

With the introduction of the *Active Participation Model* (APM) in July 2003 the methodology relating to the selection of clients in the PPM survey was revised. Prior to the APM a full enumeration of clients exiting programs and not in further assistance was attempted (with the exception of Intensive Assistance and Job Matching which were based on 25% samples).

From July 2003 onwards for APM assistance and complementary programs (such as Work for the Dole and the New Enterprise Incentive Scheme [NEIS]) the PPM survey uses a sampling approach to assess the performance of employment assistance. For these programs except Job Placement a 25% sample of clients in the following categories is undertaken:

- a) clients on full-rate Newstart or Youth Allowance (other) and/or in a subsequent program placement (also known as 'further assistance') at the time they are due to be surveyed;
- b) clients who achieved a 13 week payable outcome after receiving assistance under Intensive Support; or
- c) clients who have reached 12 24 or 36 months participation in Intensive Support (IS) without exiting.

The PPM outcome of clients in category (b) is recorded as employed or in education based on the type of payable outcome they achieved. These clients are only surveyed to obtain supplementary information about their labour force and education status. A full enumeration of clients not in categories a b or c is attempted.

In addition those clients who are surveyed at 100 are further stratified into four separate groups based on their income support type at the time they are surveyed. These groups are:

- a) clients who were on Part Working Credit or Nil rate Newstart Allowance or Youth Allowance (other);
- b) clients who were on Parenting Payment;
- c) clients who were on the Disability Support Pension; and
- d) clients who do not fall into groups a b or c listed above.

Splitting client populations into strata based on characteristics such as their income support type and further assistance or payable outcome status allows the survey responses that were obtained for particular population groups to be extrapolated back to clients in the same group who either didn't respond to the survey or who were not sampled. The survey results relating to each population group can then be combined on a weighted basis to produce overall outcomes results for the entire population.

For clients who were placed in a job through Job Placement a survey of 25% of clients is undertaken. For job seekers who achieved a Job Placement within three months of leaving labour market assistance such as Intensive Support job search training Intensive Support customised assistance and Work for the Dole the outcome is excluded from Job Placement but included under the program or service they participated in.

During 2006 several new programs were progressively included in the PPM survey and specific sampling frames have been developed to measure the post-assistance outcome levels. The sampling frames for each of these programs are outlined below.

#### *Personal Support Program*

A full enumeration of exits from the Personal Support Program was undertaken for exits between January 2006 and May 2007. For exits from June 2007 this changed to a 25% sample.

#### *Disability Employment Network*

A client is in-scope to receive a PPM survey for their participation in the Disability Employment Network (DEN) if they have either:

- a) achieved an approved 13 week outcome and that outcome was achieved after they had commenced in DEN; or

b) exited DEN and had not achieved a 13 week outcome during this period of DEN assistance.

Having identified who is in-scope for selection from August 2007 clients in the Uncapped Stream of DEN were surveyed at 100% while those who were in the Capped Stream were surveyed at 20%. Prior to August 2007 clients in the Capped Stream were surveyed at 100%.

Clients in DEN assistance Maintenance phase are excluded from the sampling frame for DEN.

#### *Vocational Rehabilitation Services*

Prior to July 2007 a full enumeration of Vocational Rehabilitation Services (VRS) exits were followed. From July 2007 onwards a 25% sample is applied to exits from the Demand Driven Stream and a one-in-three sample for the Fixed Stream.

Jobs in Jeopardy job seekers within the Fixed Stream are excluded from the in-scope population for the VRS PPM survey.

#### *Further Assistance*

A client is defined as being in further assistance if at the time they are due to be surveyed the client is found to have commenced a subsequent placement. Further assistance calculations are not currently undertaken for PSP, DEN or VRS. Intensive Support itself is not counted as further assistance unless the client moves between providers for whatever reason.

As outlined previously from 1 July 2003 onward a 25% sample of clients found to be in further assistance is included in the survey for Job Network and complementary programs. Prior to the commencement of the APM clients in further assistance were not surveyed and their outcomes were simply recorded as 'in further assistance'. While these clients may have potentially been either in a part-time job and/or in education these outcomes were not captured as these clients were not surveyed. Under the post July 2003 sampling methodology these outcomes can now be recorded.

The impact on PPM results of surveying job seekers in further assistance will vary amongst the programs. A program such as NEIS will see little impact on its outcomes given that few participants proceeded to further assistance. For other programs the impacts will vary but any variations will generally be modest.

#### *Comparing results*

In addition to the limitations outlined above in the 'Further Assistance' section care should also be taken when comparing outcomes achieved for services delivered under the APM with outcomes for similar pre-APM Job Network services. This is because similar types of assistance (eg Intensive

Assistance delivered under the first two employment services contract rounds (1 May 1998–30 June 2003) and Intensive Support customised assistance delivered under the APM) will have differences in client mix and the type and way in which services are delivered to clients.

#### *Disability Employment Network and Vocational Rehabilitation Services*

While there are some similarities between DEN and VRS comparing the outcomes results of the two programs should be avoided. The two programs target two discretely different groups of job seekers.

In addition the sampling and outcomes calculation methodology applied for the two programs differ in a significant way. In particular, DEN uses the achievement of a 13 week payable outcome in the calculation of the post-assistance outcomes. For VRS on the other hand 13 week payable outcomes are not used in the post-assistance outcomes calculation. As a result it is possible that some job seekers who achieve a 13 week employment outcome in VRS may not be employed at the time they complete their PPM survey.

#### *Intensive Support population*

The population used for the calculation of IS outcomes includes those clients who in any given reporting period first: a) exited IS b) began a 13 week period leading to an outcome or intermediate payment; or c) reached 12 24 or 36 months participation in IS without exiting.

Clients are surveyed after 12, 24 and 36 months participation to avoid potential biases in the calculation of outcomes results. If these clients were not surveyed as they progressed through IS outcomes would be overstated as those not achieving outcomes would remain in assistance and not enter the survey. Outcomes are reported for the Intensive Support population as a whole and not broken down into its sub-populations.

In addition if a client is due to be surveyed during /after their participation in IS or after participating in ISca or ISjst and is found to have been surveyed in the last 3 months then their outcome will be set to the outcome (if it is known) that was obtained when they were surveyed previously.

#### *Survey results*

Aside from IS, ISjst, ISca and DEN where PPM results are based on a combination of survey responses and payable outcomes data all outcome estimates are based on survey responses. The overall response rate for the PPM survey at around 55% provides outcomes estimates that are generally accurate to within plus or minus 1 percentage point at the National level.

## Labour Market Assistance Descriptions

**Intensive Support stream:** provides ongoing individually tailored assistance for eligible job seekers. Under Intensive Support a job seeker can have access to the general Intensive Support assistance, Intensive Support job search training and/or Intensive Support customised assistance.

**Intensive Support contacts (IS):** assistance will be provided during periods between ISjst, ISmo and ISca. During these periods job seekers will continue to have access to job search assistance and facilities at their Job Network member site guidance in relation to job search and the regular updating of their vocational profile.

**Intensive Support customised assistance (ISca):** provides for six months of assistance tailored to the jobseekers' individual needs and to available jobs opportunities. Job seekers can access up to two periods of ISca during their episode of unemployment.

**Intensive Support customised assistance (ISca1):** Job seekers who are most disadvantaged (as determined by their JSCI score) can receive immediate access to their first period of ISca1 upon registration as unemployed. Other job seekers will be eligible to receive ISca1 assistance after 12 months of unemployment.

**Intensive Support customised assistance (ISca2):** Generally job seekers can access their second period of ISca2 twelve months after they commenced their first period of ISca.

**Intensive Support job search training (ISjst):** provides training for up to 100 hours (over three weeks) in job search techniques and job application skills to give unemployed people the skills and confidence to improve their job search skills, motivation and expand their job search networks. Mature age, young and Indigenous job seekers have immediate access to ISjst on their registration as job seekers.

**Intensive Support job search training refresher (ISjstr):** provides an abridged version (30 hours) of the ISjst assistance for job seekers who had completed ISjst (or a comparable form of training) in the previous twelve months.

**Intensive Support mutual obligation (ISmo):** occurs at the same time that a job seeker's ordinary mutual obligation requirements commence. The objective of Job Network services during these periods is to ensure that job seekers continue to be actively engaged in job search activities and improving their job prospects.

**Job Search Support:** is the job brokerage assistance that all job seekers are entitled to receive. Examples of the types of assistance that can be provided include assistance with development of a job seekers Vocational Profile updating of resumes and referrals to available job vacancies.

**Job Placement:** services refer suitable job seekers to vacancies and canvass and list job vacancies on the Australian Job Search database. DEEWR licensed recruitment agencies Job Placement Licence Organisation (JPLOs) are in a position to provide Job Placement service to eligible job seekers. Job Network members are licensed as Job Placement Organisations (JPOs).

**New Enterprise Incentive Scheme (NEIS):** provides support and training for eligible job seekers who wish to pursue the option of self-employment.

**Indigenous Employment Program:** replaced the Training for Aboriginals and Torres Strait Islanders Program (TAP) and has several components. It includes Wage Assistance which is a wage subsidy paid to employers over 26 weeks providing on-going employment. In Structured Training and Employment Projects (STEP) employers in the private sector and regional and community based employment sponsor organisations provide jobs generally involving accredited training or a traineeship.

**Work for the Dole:** provides assistance for job seekers to develop work habits, generic work skills and work experience by participating in community projects and activities for up to 26 weeks over a 12 month period.

**Community Work placements:** assist job seekers to gain skills and work experience and provides access to additional benefits such as Training Credits after participating in voluntary work for a specified number of hours.

**Vocational Rehabilitation Services:** provides assistance to job seekers who have an injury disability or health condition. It combines vocational rehabilitation with employment assistance.

**Personal Support Program:** a pre-employment program designed to assist job seekers with multiple non-vocational barriers.

**Disability Employment Network:** provides assistance to job seekers with a disability focusing on achieving sustained employment outcomes.

## General Definitions

### **AJS Australian JobSearch**

**(<http://jobsearch.gov.au>):** lists all job vacancies notified to the Job Network and provides contact details for Job Network members. It is available in Centrelink and at Job Network member offices and through the DEEWR Internet site (<http://www.workplace.gov.au>).

### **Community Development Employment Projects**

**(CDEP):** is a program aimed at providing activities that; improve participants employability develop business opportunities and contribute to community needs. The overall aim is to support Indigenous Australians achieve economic independence. Positive and employment outcomes exclude Indigenous job seekers who return to a CDEP after leaving labour market assistance.

**Community Work Coordinators:** are contracted to develop Community Work placements and Work for the Dole projects/activities and manage the placement of eligible job seekers into those projects/activities.

**Duration on income support:** refers to the time (in months) that a job seeker had been on income support when they commenced their period of assistance. This can be different to their unemployment duration as someone for example on the Disability Support Pension can be on income support for a period of time before they register as a job seeker.

**Educational attainment:** refers to the highest educational level completed by job seekers.

**Education and Training outcome:** is recorded if a job seeker indicates in their response to their PPM survey that they are currently doing a course of study at a secondary school secondary college, technical college business college or university or their provider has successfully claimed a 13 week education outcome.

**Employment outcome:** is recorded if a job seeker indicates in their response to their PPM survey that they are currently employed or their provider has successfully claimed a 13 week employment outcome. Indigenous job seekers who indicated that they are currently employed in a CDEP placement are re-classified as unemployed.

**Eligible vacancy:** is a job vacancy listed on the Australian Job Search database that is eligible for a payment under Job Network.

**Further assistance:** includes job seekers who preceded to another DEEWR funded employment Program or service within three months of exiting employment assistance. It includes commencements in Intensive Support job search

training (ISjst), Intensive Support customised assistance (ISca), NEIS, Work for the Dole and the STEP and Wage Assistance components of the Indigenous Employment Policy. A job seeker who is in the general Intensive Support or Job Search Support streams of assistance are not regarded as being in further assistance.

**Highly Disadvantaged job seeker:** is a job seeker who through their JSCI is identified at high risk of becoming long-term unemployed. This is done through allocating a score against 14 separate characteristics. If the overall score recorded for a job seeker is above a specified threshold (from July 2005 it has been 25 points) then that job seeker is identified as Highly Disadvantaged and would have immediate access to Intensive Support customised assistance.

**Intensive Support commencement:** refers to a job seeker who commenced their first phase of Intensive Support assistance within the reporting period. It is possible for example for a job seeker to have commenced phases within the Intensive Support stream such as Intensive Support customised assistance during the reporting period but not be recorded as commencing in Intensive Support during the reporting period. If they commenced their first phase within Intensive Support prior to the start of the reporting period then they would not be recorded as having commenced in Intensive Support.

**Income support recipients:** includes job seekers registered with Centrelink as unemployed and in receipt of Newstart Allowance (NSA) or job seekers aged 15 to 24 not in full-time education and in receipt of Youth Allowance (Other) (YAL) or other eligible allowances such as the Disability Support Pension, Parenting Payment etc.

**Job Search Support Only (JSSO):** refers to those job seekers irrespective of their income support status who are eligible for only Job Search Support services and no other form of Job Network services. JSSO job seekers can renew their registration as unemployed every three months with either Centrelink or their Job Network member.

**Job Search Support commencement:** refers to a job seeker who has had a Vocational Profile created during the reporting period.

**Job Placements:** includes all eligible employment placements made for job seekers receiving assistance under Job Network.

**Fully Job Network Eligible (FJNE):** refers to those job seekers who are eligible to receive the full suite of Job Network services. Any unemployed person receiving Newstart Allowance

or Youth Allowance (Other) or another form of qualifying income support payment and young people not in full-time study irrespective of income support are eligible for Job Network assistance. CDEP participants are also eligible for Job Network services.

**Job Seeker Classification Instrument (JSCI):** a measurement of a job seeker's relative disadvantage in obtaining employment – because of their personal circumstance and labour market skills – and is used to determine the level of labour market assistance required.

**Not in the Labour Force outcome:** is recorded where a job seeker indicates in the response to their PPM survey that they are not currently employed and are not currently looking for employment.

**People from Culturally And Linguistic Diverse backgrounds (CALD):** refers to people from Culturally and Linguistically Diverse backgrounds where the main language spoken is not English.

**Positive outcome:** is recorded where a job seeker has achieved either an employment or education outcome. Positive outcomes are less than the sum of employment and education/training

outcomes because some job seekers achieve both an employment and an education outcome.

**Sole Parent:** is someone who either through their JSCI interviewed indicated that they are a sole parent or were on Parenting Payment Single when they commenced their period of assistance.

**Unemployed outcome:** is recorded where a job seeker indicates in their PPM survey response that they are not currently employed but are looking for employment.

**Work for the Dole (WfD) commencement:** involves a job seeker participating in a WfD activity for up to six months over a 12-month period. This means that job seekers can participate in a number of different WfD projects and with different CWCs before completing their placement. Each time a job seeker starts with a CWC a new commencement is recorded.

**Work for the Dole exit:** for the purposes of PPM occurs when a job seeker has a break between CWC placements of more than 3 months and in relation to their last CWC placement in the 12 month period. Clients exiting WfD will be subsequently surveyed.

## Regional Coverage

Regions used in this report are based on the 19 labour market regions used in contracting for DEEWR Programs and services.
